Its broad scope includes: advances in fundamental computer vision, pattern recognition and computer graphics; machine learning techniques relevant to face, gesture, and body motion; interdisciplinary research on behavioral analysis; new algorithms and applications. For this year, our conference theme is on privacy and ethical issues of FG research.

Topics of interest include but are not limited to:

- Face recognition & biometrics
- Face analysis and synthesis
- Body action and activity recognition
- Gesture recognition, analysis and synthesis
- Affective computing and multi-modal interaction
